

SPACE WORK

BY **CHRIS GODDARD**

In my 30+ years as a designer, I finally found the perfect studio space - a large mattress shop on the busiest street in town. The open space and attached warehouse were a blank canvas upon which I custom designed the perfect mix of creative and functional space. The layout eases team communication, the vertical space is ideal for displaying our resources — if you can't see it, you won't use it — and large counters accommodate laying out projects. To illustrate my aesthetic, I oversee a constant rotation of original art, architectural elements, and furniture pieces of my own design. It is truly a joy to work every day in a beautiful space that inspires creativity.
